CAREER OBJECTIVE

Aspiring front-end developer with a passion for creating responsive and intuitive web interfaces. Seeking opportunities to leverage my coding skills and creativity to deliver exceptional user experiences.

EDUCATION DETAILS

- **R.V.R & J.C College Of Engineering** **CGPA:8.52**
Bachelor of Technology in Civil Engineering, Guntur, Andhra Pradesh, 2023
- **Sri Chaitanya Jr. College** **CGPA:10.0**
Board Of Intermediate Education (MPC), 2019

TECHNICAL SKILLS

- Front End Technologies: HTML, CSS, Java script, React
- Database: MySQL
- Frameworks: Bootstrap
- Developer Tools: VS Code, Git, GitHub

PROJECTS

• Online Bus Booking Application | HTML, CSS, Java script, React, Bootstrap

- Bus route search: Enable users to search for available bus routes based on their preferences.
- Seat selection: Provide a feature for users to choose their preferred seats on the bus.
- Bus schedules: Display bus schedules so users can plan their trips effectively.
- Mobile app version: Consider developing a mobile app for users to book tickets conveniently on the go.
- Application deployment link: <https://onlinebusbooking.netlify.app/>

• Classic Snake Game | HTML, CSS, Java script

- Classic gameplay: Recreate the traditional snake game where the player controls snake to eat food and grow longer.
- Score tracking: Keep track of the player's score based on the number of food items eaten and display it on the screen.
- Game over conditions: Set conditions for the game to end, such as the snake colliding with the walls or itself, and display a game over message.
- Snake Game deployment Link : <https://dathasai0.github.io/SnakeGame/>

• Calculator, Todo-List And Weather Tracking Pages | HTML, CSS, Java script

- Calculator app: Create a user-friendly calculator for basic arithmetic operations.
- Calculator deployment link: <https://dathasai0.github.io/calculator/>
- To-Do List app: Develop an app to manage tasks and to-dos efficiently.
- To do list deployment link: <https://dathasai0.github.io/To-Do-List/>

- Weather app: Build an app to provide real-time weather information and forecasts.
- Weather app deployment link: <https://dathasai0.github.io/Weather-App/>

DECLARATION

I hereby declare that all the information provided above is true and accurate to the best of my knowledge
